

VIDEO ASSIGNMENT 2**Due date:** 04.04.2025 23:00

Watch the video given in the following link: https://www.youtube.com/watch?v=pPh5T3ZR6_k&t=1440s

Based on the content given in the video, answer the following questions:

- What are the advantages of heterogeneous/asymmetric computing? Give examples.
- What are the overheads causing imperfect parallelism in parallel part of a program? Explain each.
- What are the topics already given in our [parallelism lecture material](#)? What are the topics completely new to you in the video?
- After watching the video, which specific paper (mentioned in the video) do you want to read the most? Why?

There might be no exact answer to the questions, we will evaluate your submission by considering your understanding of the main concepts.

Very Important Note: You need to use **your own** words in the summary. You **should not** directly take the sentences from the video script or your friend's submission. We will check your submission for plagiarism. Make sure that, you rephrase all the sentences.

You are required to submit **at most 1-page pdf** file named as yourstudentnumber_ceng322_V2.pdf.
